

3mm Bleed Area

17mm Inside Wrap Area

3mm Wrap-around Area

5mm Non Text Area

IMPORTANT:

- Create artwork using a CMYK colour mode
- All fonts must be converted to outlines
- Resolution must be 300 dpi
- Delete the template layer before saving your artwork

Bleed Area 3mm: The bleed are extends out 3mm from the edge of your finished document. All images or colour that print to the edge of your document should be extended into this area to avoid the chance of any white lines appearing. Do not place any content that you wish to appear in your document in this area as it will be trimmed off.

Trim Area: This is the finished size of your document. Anything placed outside of this area will be trimmed off.

Inside Wrap Area 17mm: This section will be wrapped around the inside of the front and back covers. Please avoid putting any text in this area, but do extend the artwork if you want to avoid any of the imagery being cut off.

Wrap-around Area 3-5mm: Avoid putting any text 5mm from the edges of the wrap-around area or the spine. Text placed in this area will not be presented correctly. If possible, also avoid using any thin borders in this area as you may get inconsistent thickness.

Non Text Area 5mm: This is the area in which it is most advised to keep your text bound to. Anything outside this box runs the risk of being cut off.

Spine 10mm(Standard): Please note - the standard width of the spine is 10mm, but the more pages you add the bigger the width of your spine will be. We strongly advise you to use the "Spine Width Calculator" available on the Hardback Books product page.

HOW TO CREATE YOUR PRINT READY PDF:

1. File > Export >
2. Format > Adobe PDF >
3. Adobe PDF Preset > PDF/X-4:2008 >
4. Export
5. Open PDF and check to ensure it appears correctly
